

**TB—0387**  
**JES2 COLD START**

**Issue Date:** October 12, 2006  
**Effective Date:** October 19, 2006  
**Section/Group:** Systems  
**Submitted by:** John Marslender  
**Approved by:** Darcie Trimble

---

During the October 29<sup>th</sup> mainframe downtime there will be a JES2 cold start performed at both the Salt Lake City and Richfield sites. At that time all output awaiting print on the systems will be deleted. Therefore, it is imperative that any printout a customer needs to keep should either be printed or spun to a data set. This is being done to alleviate the fragmentation of the JES2 SPOOL data.
